

Let AI compare. *Keep the final say.*

Cross-platform shopping with exact approval,
traceable payment, and safe recovery.

Headphones · Budget HK\$1,800 · Official warranty · Arrive by 05 Oct

You approve
Exact deal,
no surprises.

Traceable payment
Secure and
transparent.

Safe recovery
Support when
plans change.

Shopping breaks across platforms.

Discovery is easy. Trusting the last step is harder.

Users still compare offers by hand, verify sellers themselves, and lose visibility once payment or recovery begins.

Compare offers

Price, seller, warranty, delivery all vary.

Approve safely

A search budget is not a payment approval.

Track payment

Users need independent transaction status.

Recover clearly

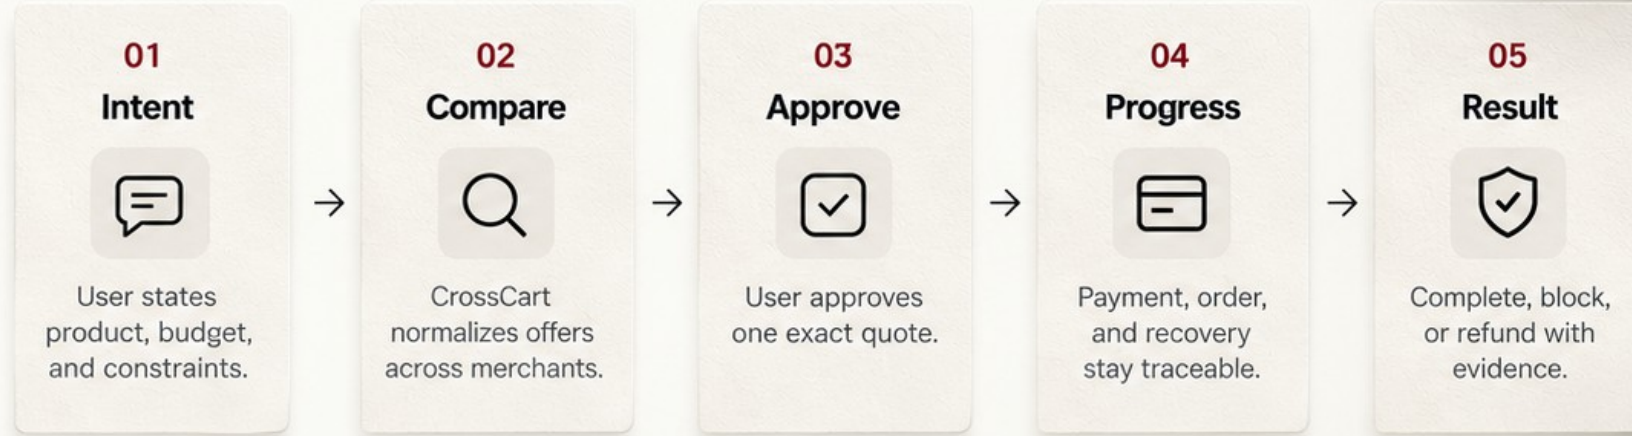

Refunds and failures should stay visible.

One flow. Five controlled steps.

AI compares. You approve. The system enforces.

CrossCart turns a complex, risky purchase into a simple, controlled flow — from intent to a verifiable result.

Exact approval

You approve the exact deal, no surprises.

Traceable payment

Secure and transparent.

Safe recovery

Support when plans change.

Your budget is a limit. Your approval is exact. *Search broadly. Spend narrowly.*

CrossCart gives AI bounded authority.
You set the guardrails. We execute only what you approve.

Search constraint

Mode Stripe test mode

**A full transaction,
visibly completed.**

Case 2 — block changed terms

Authority ends where the approved quote ends.

If the merchant changes the price, warranty, or key terms,
CrossCart blocks the transaction until you review and approve again.

Why this is blocked

-  **Mismatch detected**
Price or terms differ from the approved quote.
 -  **No checkout created**
CrossCart will not execute the payment.
 -  **Fresh approval required**
Review the new offer and approve if it works for you.
-  **Payment status: not executed**
No charge has been made. Your funds are safe.

Case 3 — captured, order failed, refund tracked

Recovery should be as visible as purchase.

When execution breaks, CrossCart keeps the user informed and the recovery traceable.

Reliable, end to end →

AI proposes. Rules decide.

Useful autonomy needs bounded execution.

CrossCart combines AI reasoning with deterministic controls to turn intent into a safe, traceable purchase.

-  **Model-assisted**
AI helps explore and generate options
-  **Deterministic enforcement**
Rules, checks and system controls

Trust controls

Exact amount binding
Only the approved amount is charged.

Changed-offer protection
Detects price, terms or item changes before purchase.

Duplicate execution guard
Prevents repeated charges or duplicate orders.

Traceable payment, order, and refund states
End-to-end logs for every step.

Built for evidence, *not just a demo.*

Working prototype first. Stronger validation next.

Why CrossCart fits HKT

Agentic commerce, with boundaries users can trust.

01

Problem-solution fit

- ✓ Cross-platform shopping
- ✓ Exact approval
- ✓ Visible recovery

REAL NEEDS. CLEAR VALUE.

02

Working prototype

- ✓ Complete transaction
- ✓ Blocked transaction
- ✓ Refund recovery

FROM DEMO TO REAL-WORLD IMPACT.

03

Trust & feasibility

- ✓ Rule-enforced spending
- ✓ Stripe test payment
- ✓ Integration-ready architecture

TRUSTED. SCALABLE. READY.
