One approved purchase

A buyer still needs to choose the seller, delivered total, warranty and delivery date.

CrossCart records those choices before a payment starts. A changed quote needs a new approval.

The cheapest offer can fail the request

Headphones. Official warranty. Within two days. Delivered total below HK\$1,800.

Demo merchant	Delivered total	Warranty	Rule outcome
Merchant A	HK\$1,749	Official	Eligible
Merchant B	HK\$1,699	Third-party	Different warranty
Merchant C	HK\$1,829	Official	Over budget

AI interprets and compares. The buyer confirms requirements and approves Merchant A.

The payment boundary

- | | | |
|----|-----------------------------|--|
| 01 | Buyer approval | Exact seller, payee, product, total, warranty, delivery and expiry |
| 02 | Server validation | Recheck the mandate and the accepted quote before payment |
| 03 | Stripe authorization | Official test Checkout holds the approved amount |
| 04 | Capture and order | Recheck terms, capture once and track the merchant order |

Three verified transaction outcomes

Scenario	Payment	Merchant order	Result
Complete HK\$1,749	CAPTURED	CONFIRMED	Purchase confirmed
Change to HK\$1,849	NOT EXECUTED	NOT CREATED	BLOCKED
Order fails after capture	CAPTURED	FAILED	HK\$1,749 REFUNDED

Eight public HTTPS cases passed on 4 October 2026. Provider retrieval confirms payment and refund states.

No real money or goods move. Orders are synthetic merchant adapters.
